

Sustainability Matters at Eastbourne

Our mission statement says we will be the natural choice by working “innovatively, sustainably and with integrity”. Our new garden centre in Eastbourne is a good example of this.

Rainwater harvesting ensures storm water is collected and reused in irrigation and toilet flushing.

Solar panels recapture enough electricity to power the till and computer systems. LED lighting reduces lighting costs by up to 90% compared to conventional lights.

Huge roof vents open the shop to allow in fresh air and remind shoppers they are in a garden centre.

Hillier Eastbourne has a beautiful location on the edge of the Sussex Downs and, although most visitors come by car, we are proud to have sponsored local buses. Look out for a Hillier bus when you are in the Eastbourne and Hailsham area!
